

Transforming postnatal suturing

There are many **benefits** to using the Hegenberger Retractor...

Suturing with

- Clear visibility
- Better overview
- Gold standard technique
- Better working conditions
- Improved patient experience
- Reduced handling
- Reduced swabbing of tissues
- Reduced suturing times

Suturing without

- Poor visibility
- Difficulty diagnosing extent of tears
- Strained clinician
- Sub-optimal learning environment for students
- Increased suturing times
- Increased handling of tissue
